Variable Information Table Display RVT

The round profiles on the sides allow
the insertion of individual text inserts.

Variable Information Table Display RVT

Significant round elements continue the consistent
design of the guidance system on a small scale.

○—○ **rohr+fläche**

At customer counters, registration desks or at meetings, you often want to visibly present the name of the person in question. This task is fulfilled by the small table displays in the size of the normal door signs. For messages on counters or at counters larger formats are needed, for this the displays in the format of the large door sign and the DIN A4 interchangeable frame are intended.
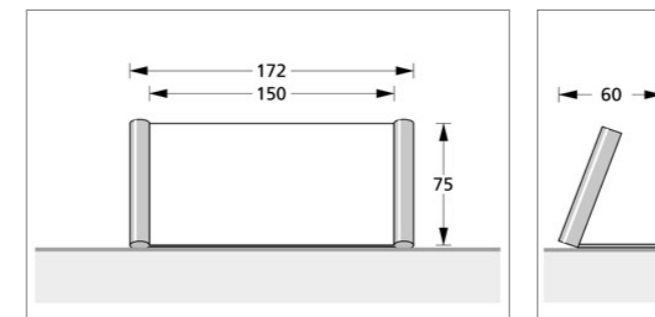

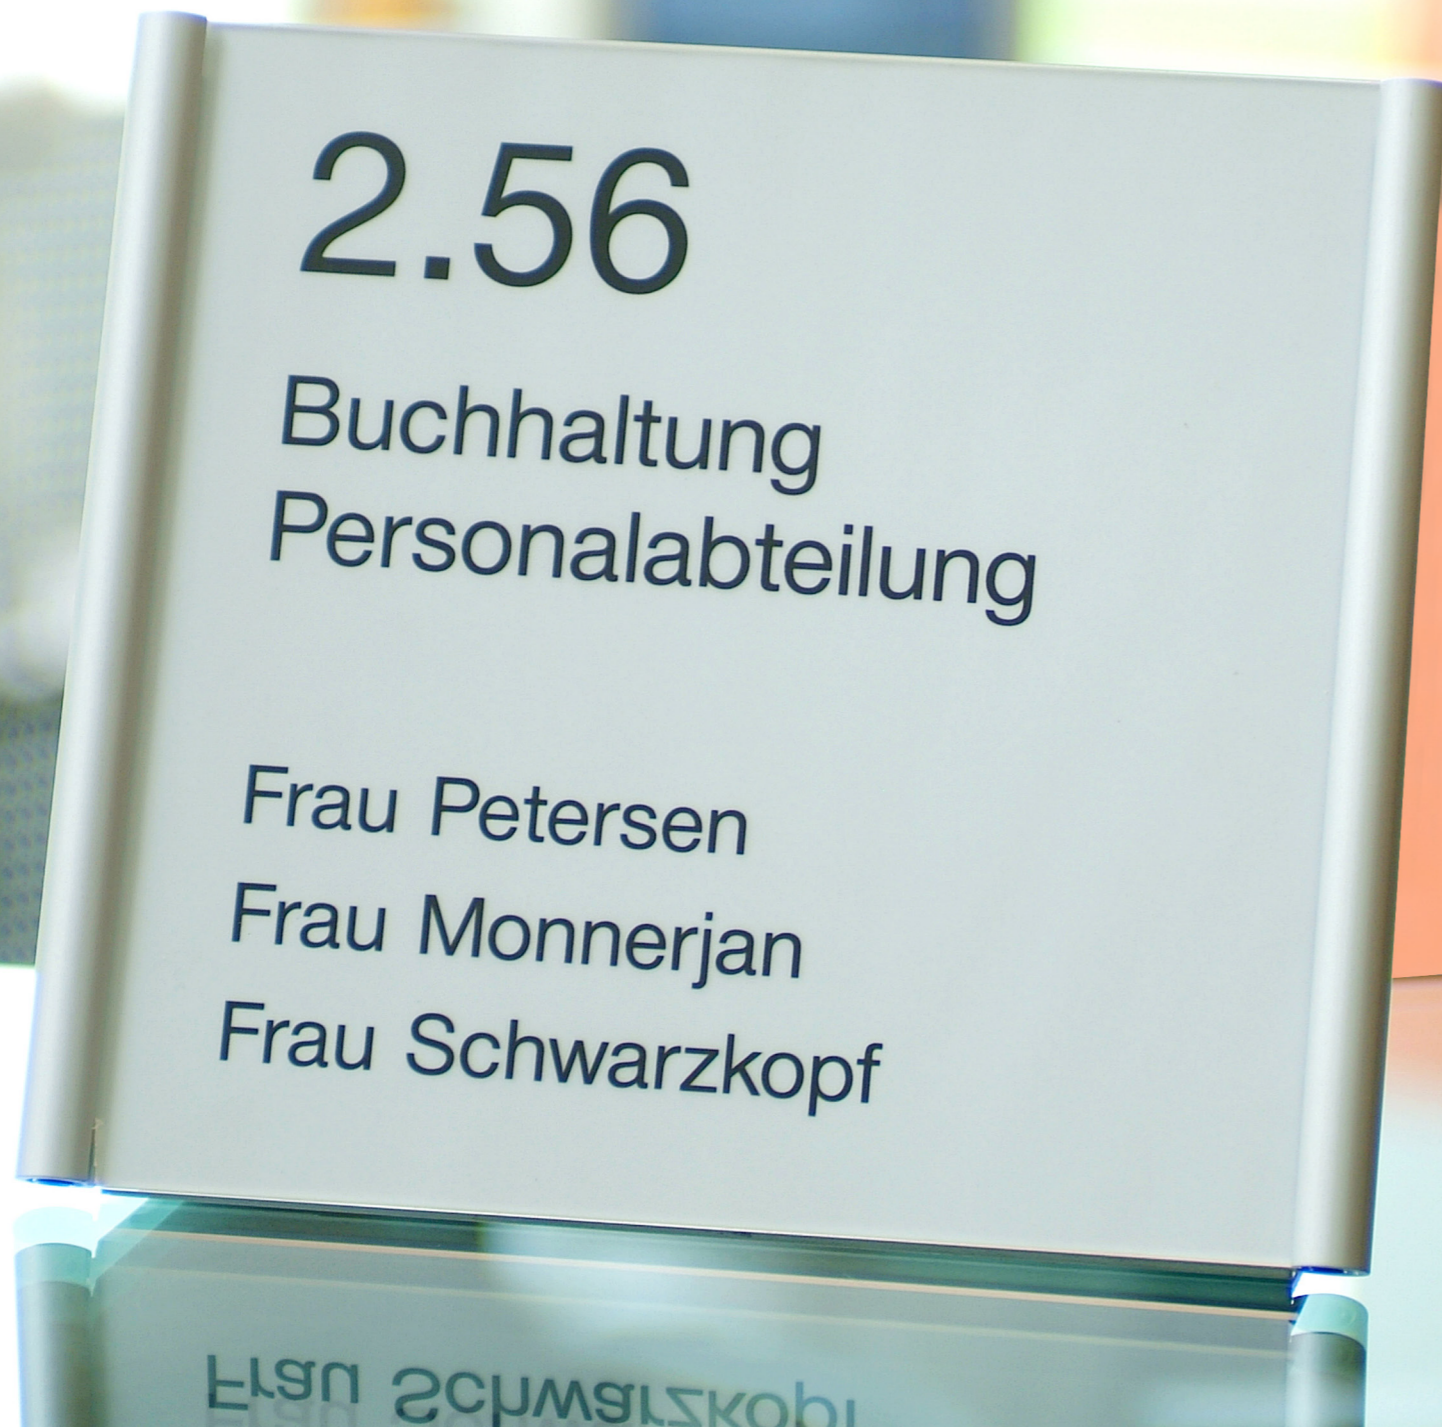

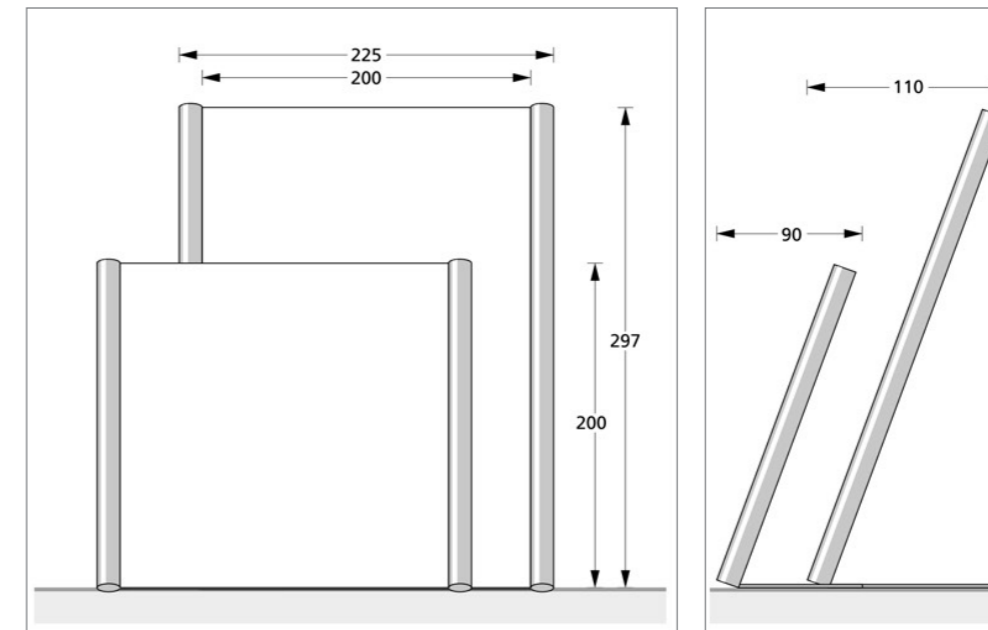

Standard sizes
Data in mm

150	
75	RVT07
200	
200	RVT20
200	
297	RVT30

Table stand small
