Stand sign RAS

rohr+fläche… over 25 years a proven system
quality as a timeless signposts generation.

Front as back!

The free-standing signs of
the **rohr+fläche** system
basically provid two sides
for the inscription.
If also the foundation-
anchoring remains
hidden under the Surface,
rohr+fläche signs provide
the perfect solution.

Stand sign RAS

With the broad modular system, individual
solutions can also be realized.

Standard RAS

With the rohr+fläche system, meng developed a classic sign, which
since 1990 has been exemplary for the complete control system design.
Since then, the RAS outdoor-stand has been used unchanged, but the
lighting is now designed with a slim, contemporary LEDluminaire.
