Transparent floating information convey timeless elegance.

# Ceiling sign transparenz TND

The innovative glass clamping function of the two aluminum profiles does not require any visible screws.

transparenz

The ceiling signs **transparenz** emphasize the information transfer and take themselves back.

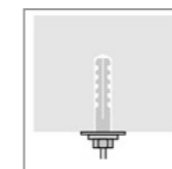

For weight reasons, we do not offer ceiling signs with glass surfaces.

Ceiling suspended signposts in the system **transparenz** offer the special attraction of a valuable information transmission. Even if they appear light due to the transparent surface, the load-bearing capacity of a suspended ceiling with the weight of the panes must be taken into account. Ceiling signs that are seen from both sides require a back cover to avoid mirror writing.

Standard sizes		300	420	600	840
Data in mm	310	[Diagram showing 310mm height for 300, 420, 600, 840 widths]			
	220	[Diagram showing 220mm height for 300, 420, 600, 840 widths]			
	160	[Diagram showing 160mm height for 300, 420, 600, 840 widths]			

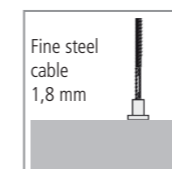

### Solid ceilings

Fastening is done with a plastic dowel, the rope is firmly pressed into the dowel screw.

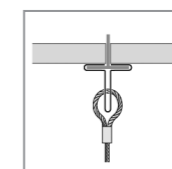

### Cavity ceilings

Cavity anchor with expansion device. Anchor and rope screw are equipped with M6 thread. The rope is pressed into the screw. Assembly pliers are available as accessories.

### Suspension

It is indented 20 mm from the lateral edge of the shield. The clamping device fixes on tension; if the clamping sleeve is pressed, the sign can be aligned or removed. For **transparenz** signs, the ropes must be shortened to the required length.

### Soundproof ceilings

Fixing claws are available for suspended ceiling systems with grid rails.

Special dimensions and material variants are also possible.
