

Fire Safety at a Glance – the RED-Unit provides clear guidance and quick access in an emergency

A comprehensive solution for workplace fire safety

The RED-Unit by meng combines a fire extinguisher, an evacuation plan and fire safety information in a clearly designed unit. It enhances visibility and orientation while blending harmoniously into the architecture of industrial halls, administrative buildings and public facilities.

Flexible Integration

Whether wall-mounted or installed in a corner, the RED-Unit makes intelligent use of the available space and creates a clearly defined point of reference for fire safety.

The RED-Unit brings together a fire extinguisher, an evacuation plan and essential fire safety information in one clearly visible location. Fire safety as an integrated element of architecture.

Easy to access, easy to remove

The fire extinguisher is securely held in place by a strong magnet on the rear panel and can be released with a simple movement in an emergency. The magnetic fixing allows intuitive handling and makes removal particularly effortless.

The RED-Unit is designed to accommodate fire extinguishers containing 6–9 kg or 12 kg of extinguishing agent.

A replaceable DIN A3 information module is positioned above the fire extinguisher. The site-specific evacuation plan is protected behind an anti-glare panel and remains clearly legible at all times. A sturdy base plate with an aluminium edge trim forms the bottom of the unit and enhances its stability.

The RED-Unit also provides space for site-specific fire safety information, for example:

- What to do in the event of a fire
- How to use a fire extinguisher correctly
- Emergency number 112
- Fire-fighting instructions
- Individual fire safety regulations or concise information

Freestanding Corner Solution

Construction: Folded aluminium sheet, 90° angle, red powder-coated finish
Dimensions: 400 x 400 mm side lengths, 1.950 mm height, 566 mm overall width
For the evacuation plan: Replaceable DIN A3 module with anti-glare panel
Fire extinguisher*:
For extinguishers containing 6–9 kg or 12 kg of extinguishing agent, with magnetic fixing
Base: Base plate with aluminium edge trim

Wall-Mounted Solution

Construction: Aluminium wall panel
Dimensions: 1.950 x 400 x 20 mm (H x W x T)
For the evacuation plan: Replaceable DIN A3 module with anti-glare panel
Fire extinguisher*:
For extinguishers containing 6–9 kg or 12 kg of extinguishing agent, with magnetic fixing

*Fire extinguisher not included in the scope of delivery.
