

LEMON+UNIT

The ALL-AROUND CARE-FREE STATION for compliance with the legal requirements for occupational health and safety and first aid.

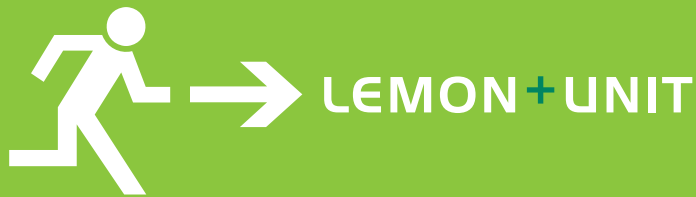

A convincing concept for operational safety

Why go to the trouble of what is available in its entirety? The LEMON unit from meng is an unit that fulfils all legal requirements for occupational safety and first aid in companies and public institutions.

The illuminated version

Visible from afar, the 3-sided luminous head panel signals its location. The intensive LED lights put the inscriptions, emergency texts and worktop in the right light in an energy-saving way. It has to be bright in an emergency!

Basic version without lighting

The LEMON unit is delivered pre-assembled and ready for installation. The profile brackets and the base are made of silver anodised aluminium. The first aid cabinet is made of sheet steel. The low centre of gravity gives the unit sturdy stability. In addition, it can be anchored to the floor or wall to prevent it from tipping over.

In the basic version, the top panel without interior lighting is labelled with foil text. The rear panel is designed as a modular system. It is equipped with 9 exchangeable tiles in DIN A4 format. One of them contains the sealed first-aid kit according to DIN 13 157C, which fulfils all legal requirements. The contents are guaranteed to last for many years and are placed within easy reach at an ergonomic height. Three further tiles are made of non-reflective Plexiglas for inserting legal notices and safety regulations. Another tile is a mirror for finding foreign objects in the eye. Five tiles can be individually equipped with existing or required emergency aids. The hygienic worktop made of 6 mm ESG safety glass measures 250 x 660 mm. The most important first aid rules are clearly visible here. The unit has a small waste box for leftover plasters. The obligatory first-aid book can be placed opposite. The first-aid cabinet underneath offers plenty of storage space for the necessary dressing material, disinfectant, eye wash bottle, blood pressure monitor and other aids. The standard colour is lemon-green. We are happy to offer our first aid cabinet also according to your individual color wishes.
