# Flex-Monolith Q60AV

A sign system will only meet its requirements
if it can be designed flexibly.

signsystems

Active cities and adventure
worlds require information ele-
ments with flexibly changeable
panels.
Concealed and protected against
vandalism, the surfaces of the
Flex monoliths can be individually
re-labelled and exchanged.

Flex-Monolith Q60AV

The mounting grid 100 mm is standard.
Individual grids can be made to measure.

meng
signsystems

External width 604 mm
Visual width 600 mm

Each panel is attached concealed
at the back. The screw connection
becomes visible and accessible only
after loosening a panel.

Das Befestigungsraster beginnt oben mit
50 mm. Die Lochabstände folgen mit je
400 mm verdeckt hinter den Sichtflächen.

Fugenmaß 1 mm

Alu-Schutzkante 2 mm

Additional holes are milled for smaller panel pitches. For subsequent
smaller pitches, additional holes can also be easily redrilled using a
template.

The smallest possible panel height is 99 mm + 1 mm joint.
These narrow panels must be stiffened at the back for stability
reasons.

Plinth panels are only available as custom-made products.
