

Car park sign QASA

Flexible and functional - including text carrier for individual labelling of the parking space

Σ quintessenz

Car park sign QASA

Stable, free-standing installation - securely anchored
for permanent representative labelling

Σ quintessenz

Individually inscribable parking space sign

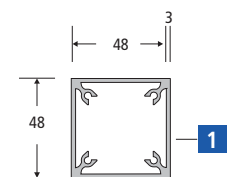

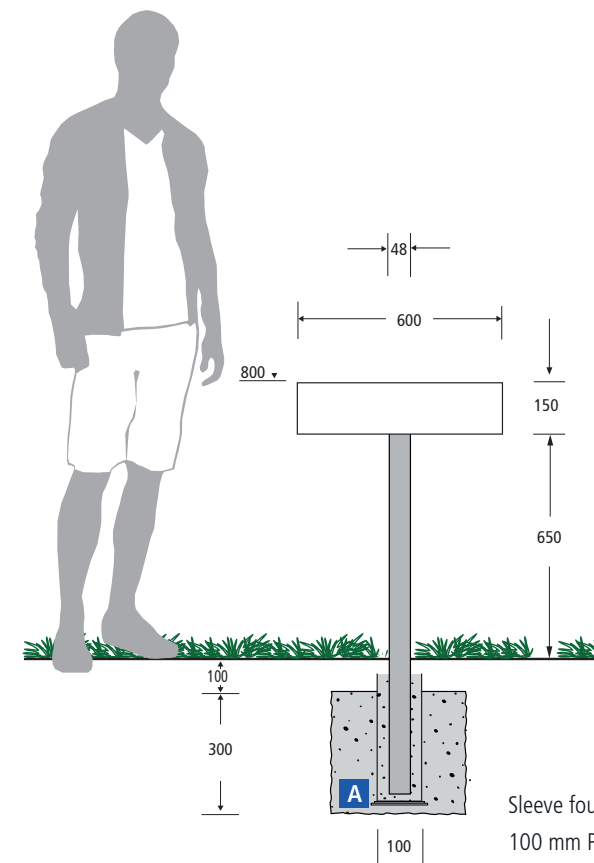

The high-quality parking space sign made of folded aluminium offers a durable and weather-resistant solution for clearly marking parking spaces. A particular advantage of this system is the option of customised lettering on the text carrier. This allows parking spaces to be clearly assigned to specific employees, departments, customers or vehicles, for example. Temporary or changing uses (e.g. visitor parking spaces, e-charging stations) can also be flexibly displayed using interchangeable labelling.

The post profiles

- 1** System post aluminium 48 x 48 mm

The anchoring

- A** Concrete must be inserted into the hole to be excavated in good time before the sign installation to harden.

Application

For free-standing installation, set in concrete in the on-site sleeve foundation - this ensures that the sign is permanently stable and protected against theft.

Consists of a folded aluminum sign plate, fixed to the vertical post without any visible fasteners on the front face.

The post is a square aluminum system profile.

Both components are anodized in silver as standard.
