Interchangeable frames form a universally applicable component in an information and guidance system. With printouts on paper in DIN format, messages are quickly put into a neat frame - in other places, you see stuck-on slips of paper or, at best, transparent pockets in different shapes. All applications are hardly enumerable - here are a few of the most important: escape route plans, fire protection regulations, menus, house rules, timetables, meeting room labeling, price lists, tables, aids for labeling in the context of quality management and certification - or even as small signposts or overviews. In addition to the normal wall version, the DIN A4 portrait format is also available as a tabletop display or as a suspended element.
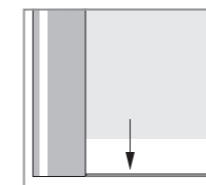

Fuse
Acrylic disc and text sheet can be additionally secured by locking pins in the profile.

RVW 3020   Ø 14 mm

DIN A4 interchangeacable frame
continuous, lacquered or anodized aluminum profile with acrylic pane crystal clear or antireflex as well as white insert plate.
