

Table stand quintessenz QVT

In the service area, customer proximity, trust and transparency are required.

Σ quintessenz

Individual

The table displays with their minimal stainless steel edges signal unobtrusive value. And yet they can be individually designed and labeled.

Standard sizes

Data in mm

Wherever service is associated with personal customer contact, it is important to be able to address the contact person by name. Nameplates with permanent lettering are too inflexible, and cardboard signs do not meet any solid requirements. The **quintessenz** table displays combine flexibility with unobtrusive value and are thus used for different applications. Even small details can be solved within a complete, coordinated system.

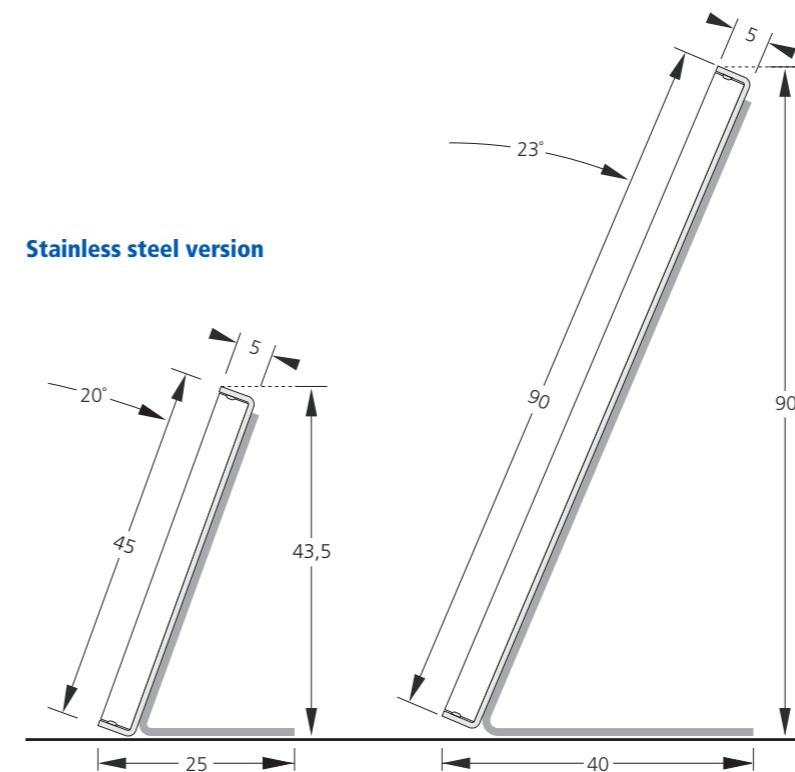

Type of construction

The labeling area of the tabletop display is 88 x 178 mm or 43 x 178 mm. Pre-punched DIN A4 sheets and an input file with text layout make it easy for the user to do the labeling himself. The flush-clipped, anti-reflective cover plate can be easily removed with a suction tool for replacement.

Variants

In the standard version, the stainless steel table display is available in two sizes, whereby the smaller version with a viewing area of 45 x 180 mm has an aluminum header 15 mm high. As with the door signs, a plastic version is available for the stainless steel version, which is equipped with a silver-colored aluminum stand instead of the stainless steel. Larger dimensions are also available based on the interchangeable modules, these can be designed in DIN formats up to A3 depending on requirements and intended use and can be produced at short notice.
