

Stand sign QASA

Low/mid sized signs for communicating secondary information

Σ quintessenz

At times, outdoor pillars may appear too dominant for the provision of secondary information. In this case, you may consider our low-mounted signs, which are reasonably priced and easy to integrate to your existing guidance systems.

Stand sign QASA

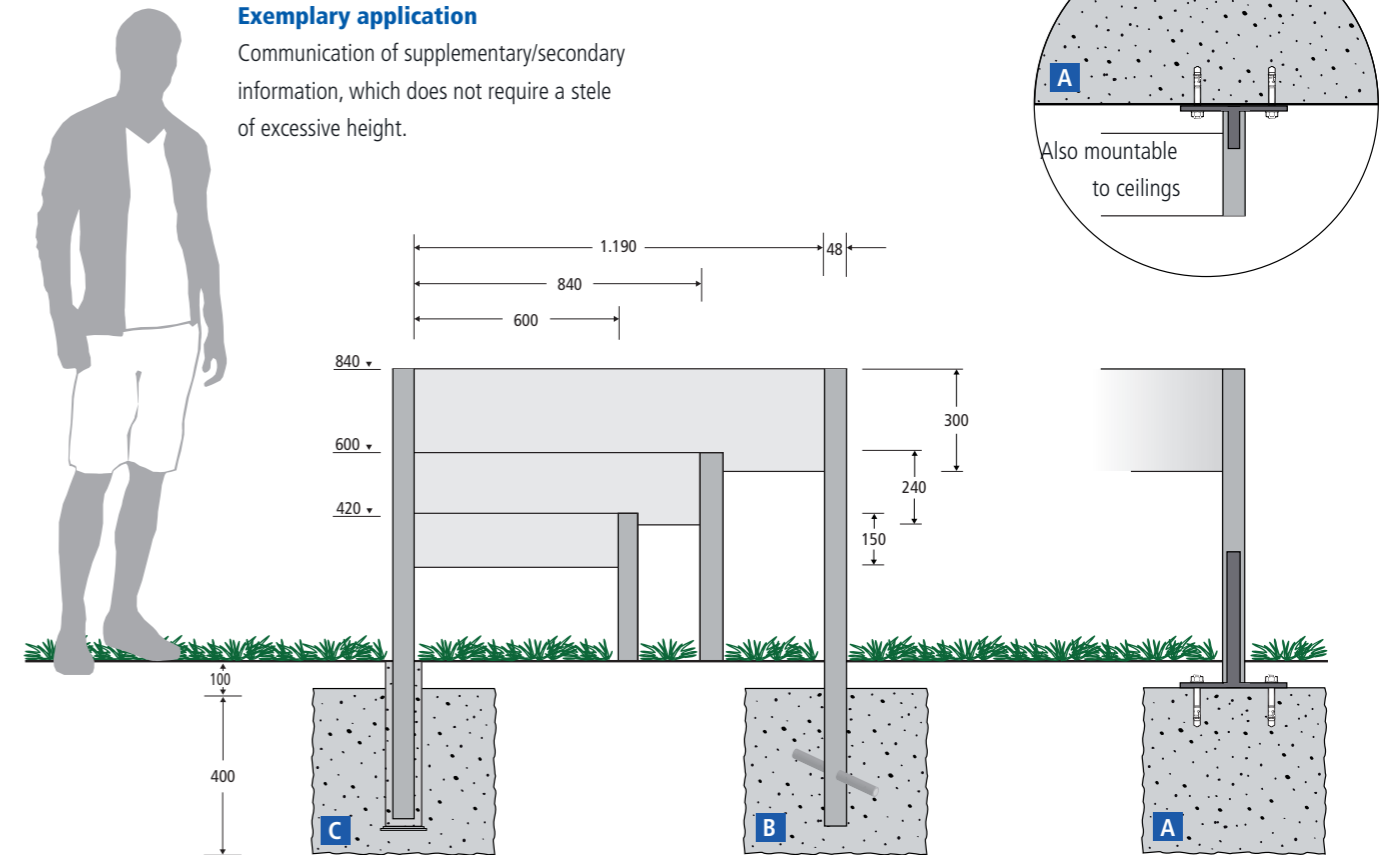

Low/mid sized signs with quadriatic profile

Σ quintessenz

Exemplary application

Communication of supplementary/secondary information, which does not require a stele of excessive height.

Installation

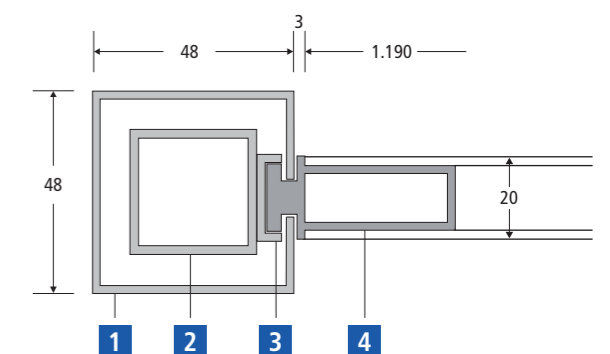

- A** Flanges for installation both onto solid foundations and ceilings.
- B** Concrete tamped foundation for direct ground insertion.
- C** As B, however, such as A additionally flanges have to be inserted to foundations for hardening prior to the sign installation.

Frame profiles

- 1** Aluminium post system measures 48 x 48 mm.
- 2** Reinforcement required for customizations with larger dimensions.
- 3** Adapter profiles are compatible with r+f frames
- 4** Hollow panels are available for custom labelling (area: 20 mm), design identical to our RASK and RAST models.

Compatibility

Visible widths are explicitly adjusted to the Quintessenz stele system. Additionally, r+f panels are fully compatible.
