compensated with spring-loaded

stainless steel edges. This innovation

has received numerous awards, inclu-

ding the German Federal Design Prize.

quintessenz principle a role model in

The frameless design makes the

the signage industry to this day.

QVM 4230

QVM stands for quintessenz 30 Width in cm

Variable Module

The standard dimensions refer to the paper formats.
The outer dimensions of the modules are 4 mm larger.

Article description

Size

DIN formats and squares
In addition to the DIN formats, all
edge dimensions can also be combined
to form square modules, e.g. 280 x

a depth of 20 mm.

The possible edges are 150, 210, 280, 300, 420, 600 and 840 mm long.

Special dimensions that deviate from the existing edge lengths are not possible due to the tooling. Screw mounting is standard. Adhesive mounting QVMK possible on request.

The modules are only conditionally suitable for use in free weathering.

Customized
